

CBME Conference 2017

Queen's University is on an accelerated path to Competency Based Medical Education (CBME) as the first Canadian institution to transition all residency programs to CBME curriculum models on July 1, 2017.

Join us in Kingston November 8&9 as the Queen's CBME executive team, program leaders, residents, and other stakeholders share the Queen's experience with CBME: the Good & the Bad, the Challenges & the Opportunities.

Medical education leaders will learn how to operationalize CBME on the ground and leave the conference with concrete strategies to assist with implementing and supporting CBME in their own programs and institutions.

Schedule at-a-Glance

Keynote Address by Dean Richard Reznick: *Delivering on the Promise of CBME*

Plenary Address: *Setting the Stage – Early Lessons in CBME Implementation*

Plenary Address: *What Worked, What Didn't, and How it All Comes Together for Programs*

Plenary Address: *Leading the Change*

Concurrent Sessions

- Leveraging Technology to Support CBME
